## **THE ON-GOING SUCCESS OF KEMET INTERNATIONAL LTD**

For almost 70 years, Kemet International Ltd has been at the forefront of Precision Surface Finishing Technology. They now have Subsidiary and Associated Companies in many parts of the world who together contribute towards solving today's most challenging super finishing problems.

Kemet is undergoing a period of expansion and has just purchased adjoining premises providing an extra 20,000 sq ft of manufacturing space. This has allowed significant improvements in sales and customer support.

The Company now boasts 3 purpose-built Technical Centres where customers can view demonstrations, undergo product training and learn about all aspects of Precision Surface Finishing.

The **NEW** Flat Lapping Technical Centre is equipped with 10 Kemet Flat Lapping and Polishing Machines and the widest range of Lapping Systems allowing a fast turn-round of customers' samples. The Centre also has Double Sided and Spherical Polishing Machines, along with the latest Mitutoyo Surface Measuring and Flatness Inspection Equipment. Training Courses are available throughout the year.

The **NEW** Cleaning Technical Centre is also fully equipped for demonstration and training. More than 10 Cleaners are available at any time. These range from the small Laboratory Cleaners through to the latest large Mould Cleaning Systems. The Company's Chemists are able to advise the best Cleaning Solutions and also waste disposal methods.

For many years Kemet has been well known for its comprehensive range of products for the Precision Engineer and Toolmaker. The **NEW** Tooling Technical Centre is now complete and equipped with the very latest in Power Hand Tools from leading manufacturers such as NSK and Diprofil.

Kemet has over 10,000 products, many of which can be evaluated in the Centre. These include the market leading Kemet Diamond Compound and Slurry ranges, Gesswein and Xebec Abrasive Stones, Ultrasonic Polishers and Mould Welders.

To complete the programme, Kemet's Metallography Product Range is amongst the most comprehensive in the UK. Included are equipment and consumables necessary for cutting, mounting, lapping, polishing and cleaning of any material ready for microscopic examination.

The success of Kemet International Ltd over nearly 70 years can be attributed to its on-going ability to be at the forefront of product innovation, combined with its total focus on customer service and support.

In the world of Precision Surface Finishing, few companies can compete at this level.
