

Kemet

Kemet Facing Kit

Kemet can offer the next generation of workholders – Kemet facing kits.

The Kemet facing kit consists of a non skid rubber pad. This pad can be fixed to the bottom surface of the handweight. The handweight with the pad is then placed directly on top of the parts which have been positioned inside the conditioning ring. Lapping can occur and the parts will not skid out of position.

Kemet Facing Kit on handweight for Kemet 24 Lapping machine
