

Kemet

Consumables, Spares and Accessories

Kemet Abrasive Products

KEMET supply the widest range of Abrasive Products, including Liquids, Pastes, Suspensions and Powders. Aluminium Oxide and Silicon Carbide are available in all grit sizes.

Kemox

A range of suspension treated abrasives where the abrasive and carrier are pre-mixed in the correct proportions, resulting in a cleaner and more efficient Lapping Process.

Abrasive Pastes

KEMET manufacture a wide range of abrasive pastes including SABRE which is produced with Aluminium Oxide and is suitable for most fine lapping work. Our range of Silicon Carbide and Aluminium Oxide pastes have many applications but are particularly suited to the lapping of mechanical seal and valve seats. They are available in 1kg containers.

Col-K

A liquid polish used on KEMET CHEM CLOTH to produce the ultimate in high quality mirror polishes on polishing machines. A part abrasive part chemical polishing action makes COL-K well suited to polishing difficult materials such as Stellite and Cobalt Chrome.

KDS811

Diamond suspension for double side lapping machines

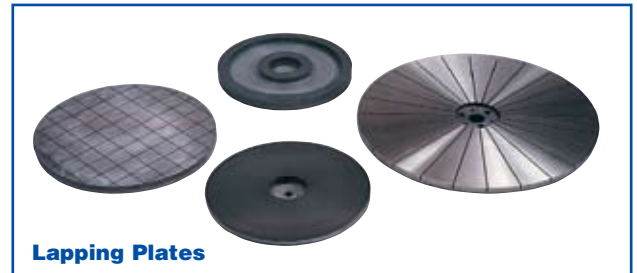

KEMET have developed a superior Diamond Abrasive Suspension for use with twin wheel lapping processes. KDS811 is self lubricating and gives a high material removal rate. It can be used with a Peristaltic Pump to replace a non-Diamond Abrasive Process.

Kemet has a large stock of consumables, spares and accessories to ensure trouble-free use of your Kemet Lapping System.

Free process advice is available when selecting lapping plates or abrasive.

Lapping Plates

We offer a part exchange service for all worn Kemet Lapping Plates. Cast iron and soft metal plates are available for most machines.

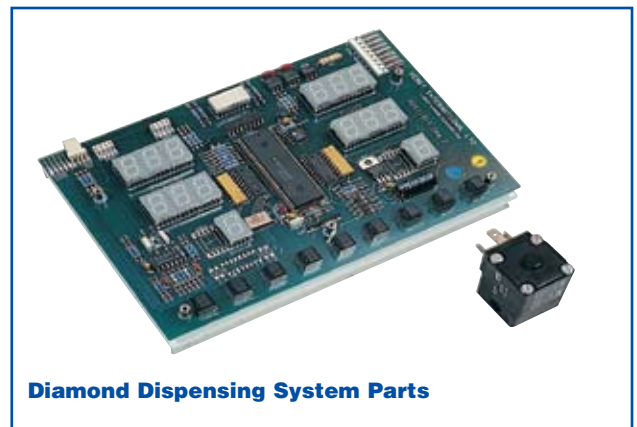

Conditioning Rings

Conditioning Rings wear naturally as part of the lapping process. Replacements are available to fit most flat lapping machine models.

Diamond Dispensing System Parts

Replacement and part exchange parts are readily available for all current Kemet Dispensing Systems.

Workholding

Non skid and felt pads for all machines can be supplied, together with blank workholding discs.
